YieldMax™ MRNA Option Income Strategy ETF - at NAV	-36.73%	-38.14%
S&P 500® Total Return Index	38.02%	36.36%

The Fund's past performance is not a good indicator of how the Fund will perform in the future. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.

Visit www.yieldmaxetfs.com/our-etfs/MRNY for more recent performance information.

How did the Fund perform last year and what affected its performance?

During the reporting period, the Fund generated negative total returns primarily due to the negative performance of its underlying asset MRNA. It still paid out substantial monthly dividends due to capturing higher volatility.

Selling covered calls or covered call spreads allowed the Fund to capture extrinsic time value available for distribution to shareholders while offering a portion of the upside capture.

What Factors Influenced Performance?

The implied volatility of the underlying security plays a significant role in the amount of extrinsic premiums that can be paid by the Fund. During the reporting period, the underlying MRNA saw higher implied volatility that was consistent throughout the reporting period.

As a rule, the higher the implied volatility, the higher the option premiums available for sale and distribution.

Since the Fund has downside risk of the underlying, taking in premiums helps offset negative moves where an investor in the Fund would potentially expect to lose less over a period.

Conversely, investors may forgo a portion of the upside which is an expected trade-off in exchange from capturing option premiums.

Positioning of the Fund

The Fund aims to generate high current income for investors looking for alternative yield options in the marketplace with the ability to sell covered calls and/or covered call spreads, all while having the ability to capture a portion of the upside movements of the underlying stock.

This is a summary of certain changes to the Fund. For more complete information, you may review the Fund's Prospectus.

How has the Fund changed?

Effective September 6, 2024, the Fund will at times opportunistically sell a credit call spread (described below) instead of selling a call option (i.e., the standard strategy) when ZEGA Financial, LLC (the Sub-Adviser) believes doing so will be more advantageous to the Fund's total return.

Changes in and Disagreements with Accountants

There were no changes in or disagreements with accountants.

Householding

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.
